### NEW ABSTRACT

A method and apparatus (100) for creating and distributing satellite tracking data in a compact form to a remote receiver (112). At least a portion of the satellite tracking data is extracted from memory (120) and is formatted into a compact form (111). The compact formatted data (111) is transmitted to the remote receiver (112) via a distribution network (114, 116). Once this data is received at the remote receiver (112) it is reformatted into a format prescribed by the remote receiver (112).
